DETAILED ACTION

1. Applicants' response to Election/Restriction was received on 10/8/2008 and 10/15/2008. Claims 3, 4, 7 are withdrawn.
2. The text of those sections of Title 35, U.S.C. code not included in this action can be found in the prior Office Action.
- 3.

Election/Restrictions

4. Applicant's election without traverse of Group 1, claims 1, 5, 6 and 8 in the reply filed on 10/15/2008 is acknowledged. It is noted the Applicants response of October 8, 2008 was rescinded.
5. After further consideration, the Examiner found another species within Group I. This application contains claims directed to the following patentably distinct species, Applicant is required to elect a specific method of manufacturing a fuel cell separator as recited, for example, in claims 1 or 5, 6 and 8.
6. The species are independent or distinct because claims to the different species recite the mutually exclusive characteristics of such species. In addition, these species are not obvious variants of each other based on the current record.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there are no generic claims.

There is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. The species require a different field of

search (e.g., searching different classes/subclasses or electronic resources, or employing different search queries); and/or the prior art applicable to one species would not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species to be examined even though the requirement may be traversed (37 CFR 1.143) **and (ii) identification of the claims encompassing the elected species**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the

prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141.

7. During a telephone conversation with Samir Khoury on 11/10/2008 a provisional election was made without traverse to prosecute the invention of Group I, claim1. Affirmation of this election must be made by applicant in replying to this Office action. Claims 5, 6 and 8 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Priority

9. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

10. The information disclosure statement (IDS) submitted on 10/15/2008 and 1/11/2005 was filed. The submission is in compliance with the provisions of 37

CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Drawings

11. The drawings were received on 12/7/2004. These drawings are acceptable.

Claim Rejections - 35 USC § 102

12. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

13. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Itou et al. (JP 08-259767).

The Itou et al. reference discloses a method of manufacturing a bipolar-plastics board (Applicants separator) with liquid manifolds (P6). The bipolar-plastics board ethylene-vinyl acetate copolymers, ethylene ethyl acrylate copolymers and Ketchen black carbon (P 30) are mixed. An electron-beam-irradiating bridge construction is carried out after forming an electroconductive-plastics board (P22).
